Helping Utah Manufacturers Grow and Thrive

Sourcing COVID-19 PPE from Utah Companies

Free Consultation

Challenge:

Public and private purchasers want to know where they can source Utah-made PPE materials. Spending PPE dollars domestically supports America's economy.

Solution:

CONNEX™ UTAH will identify Utah manufacturers along with their certifications and capacity. This tool will allow manufacturers to search for in-state manufacturers who are looking for parts, components, processes, sub-assemblies, certifications, and equipment. The information can be searched by any of these data elements and provide the ability to upload and manage bids as well as communicate with other manufacturers. Utah companies manufacturing PPE will get special attention to make sure they are in this system.

Utah companies manufacturing PPE will receive direct help to make sure they are in CONNEX™ UTAH.
