

The ability for Utah
Manufacturers to
connect with the U.S.
Manufacturing
Supply Chain has
finally arrived!

The power of state and federal economic development resources and manufacturing partner networks has come together to make State and National supply chain connections a reality.

UTAH-MEP proudly introduces CONNEX™ UTAH, the most advanced supply chain and manufacturing networking database tool ever assembled to connect the U.S. manufacturing supply chain and promote domestic sourcing whenever possible. Use CONNEX™ UTAH to source and be found locally within the state, and directly connect

through it to the CONNEX™ Marketplace to see, be seen, and network nationally.

CONNEX™ UTAH was designed with the resources to make it the best supply chain tool ever, and unlike other online manufacturing registers and directories, CONNEX™ UTAH offers enhanced listings, search access and networking tools to America's great manufacturers.
