

GROWING JOBS IN UTAH

The Utah Manufacturing Extension Partnership (Utah-MEP) works with small manufacturing companies to create high-paying manufacturing jobs. We are measured quarterly on how many jobs are created or saved by the work we do. We focus completely on driving that job growth and expanding the Utah economy.

Every manufacturing client requires a customized approach focusing on their specific obstacles to growth and profitability. Whatever the need, UTAH-MEP offers the tools, expertise, and flexibility to engage with manufacturers and rural businesses at all levels.

Our all-star team of coaches, practitioners, and industry experts have one purpose:

**Help Utah Manufacturers
Grow and Thrive.**

ABOUT ACT AEROSPACE

Since 2004, ACT Aerospace has been a leader in the aerospace and defense industry. ACT creates crucial components on some of the most respected aircraft in the industry and has earned a position based on reputation for quality engineering. The company is headquartered in Gunnison, Utah, with 52 employees. ACT's capabilities include hand laid-up laminate construction, filament winding, composite compression molding and large autoclave/oven curing.

THE CHALLENGE

As a supplier to the aerospace industry, ACT Aerospace must maintain certain certifications regarding the quality of their work. A key client demanded a review of DFARS compliance, particularly focused on reviewing ACT's NIST 800-171 to demonstrate cybersecurity requirement compliance.

MEP CENTER'S ROLE

iMPact Utah, sub-Recipient of the University of Utah MEP and part of the MEP National Network™, worked with the key members of ACT Aerospace team to review the current state of cybersecurity within the company. As part of this project, iMPact trained staff with NIST SP 800-171 Cybersecurity guidelines and requirements and helped them to maximize current IT technology and staff capability. iMPact also worked with ACT to develop a cybersecurity plan. The company's client approved the plan and allowed the order pipeline to continue. As a result of this project, ACT also has documentation to prove they are following the guidelines and requirements for DFARS compliance.

ACT Aerospace appreciates iMPact Utah's expertise for our cybersecurity need.

We understand the importance of being DFARS compliant in our industry.

We already have experienced staff in the field and Impact was able to help us tighten things up in a few key areas.

The plan we jointly developed works for us, we can update it, and it will live on after they leave.

– BRET ASHTON, HEAD OF BUSINESS DEVELOPMENT
